

PRODUCT SUMMARY

Static IP

Information About the Service

Static IPs are used to run internet servers, including: Web servers; Email servers; Virtual Private Networks (VPN). In order for a user to access your server they must know the server IP address, that's where a Static IP is helpful.

All business plans include one free static IP address. Additional IP addresses can be purchased on the Premium Fibre plans.

One Static IP is included in the following plans as a default.

- Essentials Fibre – Essentials 100, 200 & Pro
- Business VDSL
- Premium Fibre – Business 200 & Gig

Additional Static IP is only available as an add-on for the following Premium Fibre plan

- Business 200
- Business Gig

Limitations & qualifications

The static IP address remains the property of MyRepublic and is not transferable. Additional static IP address can only be purchased on the Premium Fibre plans.
