

STATEMENT TO THE MEDIA

MyRepublic Pre-Qualified to Participate in 4th Telco Spectrum Auction

16 Nov 2016, Singapore

IMDA has announced today that MyRepublic has been pre-qualified to participate in the New Entrant Spectrum Auction -- a validation of MyRepublic's readiness and capability to be Singapore's 4th mobile operator.

This is truly exciting news, and we are one step away to becoming Singapore's new telco.

Since we announced our intention to be Singapore's 4th mobile operator, over 80,000 people have expressed their support. The response has been heartening and we remain committed to bringing Singapore a truly fixed-mobile converged offering, including generous data, seamless coverage and support for the massive potential of the Internet of Things (IoT).

Just as MyRepublic's success in Singapore continued with us launching high-speed Next Gen connectivity in New Zealand, Indonesia and most recently Australia, we are hopeful that we will have the opportunity to bring a new generation of fixed-mobile converged services to the region.

We look forward to participating in the spectrum auction.

ABOUT MYREPUBLIC

Purpose-built for the fastest Next Generation National Broadband Network (NBN) in 2011, Internet Service Provider MyRepublic continues to redefine the standard of fibre broadband services in Singapore and the region. Having launched in New Zealand, Indonesia and Australia, MyRepublic continues to push the boundaries with its innovative and consumer-centric service offerings, with its latest sights set on the Singapore mobility market.
